Stages run

4

Gaps

0

Long gaps

00:08

Longest gap

00:19

Total off chest

Key intervals

Simulation-clock times for critical actions

0:09

First compressions

0:20

Pads

0:36

Epinephrine

0:39

Defibrillation

01:30

ROSC announced

Code timeline by stage

Clinical actions and simulation clock timestamps

Stage One

Initial response

Begin simulation

8/21/2026 at 14:31:41

Initial pulse check

0:05

Initiated compressions

0:09

Initiated BVM

0:17

Applied pads

0:20

IV/IO access

0:33

Rhythm/pulse check

0:43**0:52**

Epinephrine administered

0:36

Defib delivered

0:39

Stage Two

Optional continuation

Begin Stage 2

0:47

Rhythm/pulse check

0:52

Epinephrine administered

0:53

Defib delivered

01:31

Switch compressors

0:56

Continuous compressions

0:59

Breath every 2-3 seconds

0:59

Stage Three

ROSC & handoff

Begin Stage 3

01:17

Checked pulse

01:29

Announced ROSC

01:30

Stopped compressions

01:31

Post-resuscitation care

01:31

Called for transfer

01:32

Clicked Go to Debrief

01:36

Compression activity

Green = compressions on · Red = gap · Amber = long gap ("e10s)

Compression quality

Time between compressions (off to on) from the simulation clock

4

Gaps between CPR

00:19

Total time between

00:05

Average gap

Time between compressions (each gap)

Gap 1: 00:25-00:29 = 00:04 between compressions
Gap 2: 00:43-00:45 = 00:02 between compressions
Gap 3: 00:52-01:00 = 00:08 between compressions
Gap 4: 01:08-01:13 = 00:05 between compressions

Compressions timeline

Off/on events with calculated time between each compression cycle

Event log

Initial compression started at: 0:09

Event log (continued)

Compressions off: 00:25

Compressions on: 00:29

Time between compressions: 00:04

Compressions off: 00:43

Compressions on: 00:45
